

AWV external wall fan

Features

- Supply of small to medium air volumes at high resistances.
- Ideal for renovation and retrofitting due to external installation.
- Optimised efficiency, low maintenance costs.
- Centrifugal impellers made from synthetic material, with backwards curved blades.
- Inlet-side mountings for installation in ventilation ducts.
- Integrated shutter.

Mounting instructions

- For installation on the external wall.

Motor

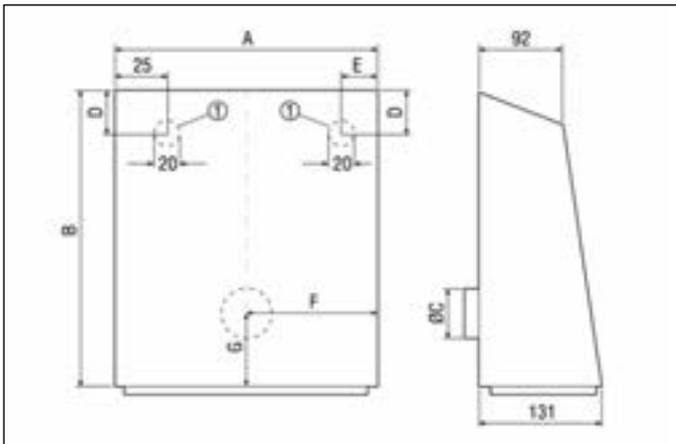

- Capacitor motor.
- Speed controllable.
- Thermal overload protection as standard feature.
- Robust motor with ball bearings, maintenance-free.
- IP X4 degree of protection when installed in ventilation ducts with at least 1 m of duct on the inlet side.

Safety instructions

- The fan can be operated only if the protection against accidental contact with the impeller is guaranteed to be in accordance with DIN EN 13857 for fans with a free inlet.
