

AW sileo

- Speed controllable by voltage reduction, plus option of 2-step operation by D/Y switching for 400V versions
- Inlet protection guard up to size 630, for bigger sizes as accessory
- Safe and maintenance free operation
- Electric connection via terminal box mounted on the motor
- Single phase fans are supplied with capacitor

Axial fans of the AW sileo range do have a bionic shape of the fan blade, which reduces the noise level and increases the efficiency of the fan. AW sileo fans are driven by external rotor motors. The AW range is equipped with a square wall plate, galvanized steel and powder coated in black (RAL9005). The protection guard at the inlet side is powder coated in black. The axial impeller is manufactured either from pressure die cast aluminum, powder coated in black, or from high efficiency composite material.

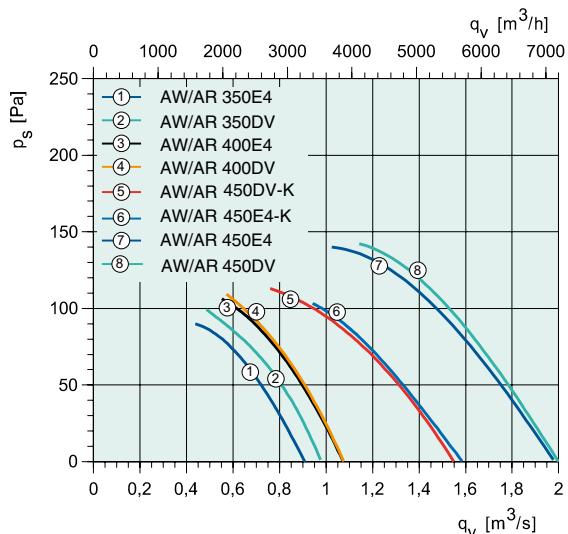

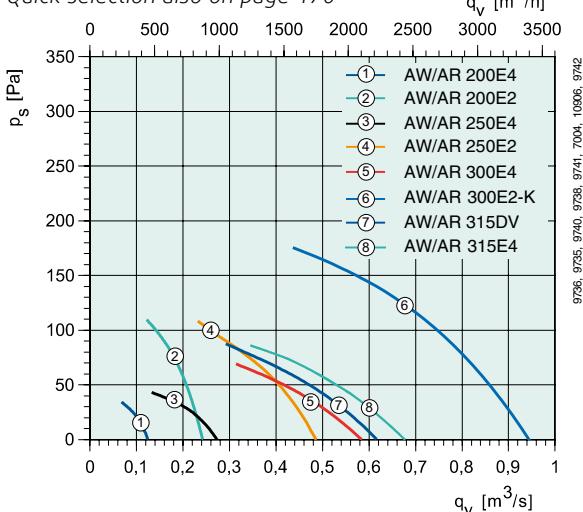

The impeller is balanced dynamically in two levels in accordance with DIN ISO 1940 part 1, quality G6.3.

The motors are equipped with thermal contacts for motor protection, with leads to be connected to a motor protection unit, for example Systemair unit S-ET.
