

Description

High-Quality White Powder-Coated Metal Adjustable Ceiling Extract Valve with lockable settings. The KU ceiling extract valve are for installation on ceilings and walls. The valve has a lockable central cone which is rotated to adjust the pressure and consequently the air volume.

Aesthetically pleasing manufactured from sheet steel with a white powder-coated finish (RAL 9010-80) and is available in the following diameters: \varnothing 80, \varnothing 100, \varnothing 125, \varnothing 150, \varnothing 200, \varnothing 250.

Material: steel sheet
Furnishing: furnace enamelling
Standard colour: white

Technical Data

Parameters

Volumetric flow q (l/s or m^3/h), total pressure loss P_t (Pa), and acoustic pressure level L_A (dB(A)), can be read from the figure.

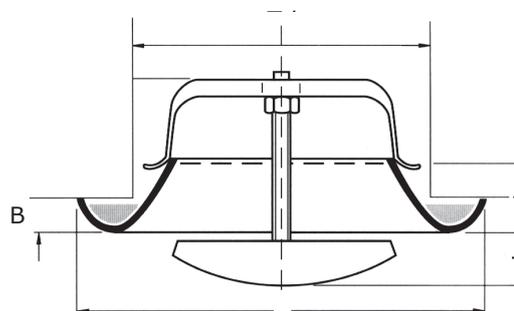

Pressure losses P_t

The figures show total pressure loss P_t (Pa).

Acoustic pressure level, L_A

The figure shows acoustic pressure level L_A (dB(A)). The noise level is specified for a room attenuation of 4dB, which translates into attenuation in the reverberation zone of the SABINE room with an acoustic absorption of 10 m^2 .

Mounting Frame **KU**

Description

Ceiling and wall mounting flange with a bayonet socket. The connecting spigot is male and fits directly into Spiral ducts and all types of the flexible ducts.
