

# Filter Box PF150AL

## Dimensions

## Description

The PF150AL duct filter is applicable for filtering air in round ventilation ducts of standard diameters 100 - 315 mm, the filter is mounted in a galvanized steel housing with convenient fastening clasps on the upper access panel.

The filter element is mounted in the duct housing, its construction is very simple - filtering material is trimmed on a frame made of steel wire. The PFAL150 filter element is available in two filtering classes EU3 and EU5. .

Example identification                      PF150 - 100
